How much light do you want?  
What length do you need?

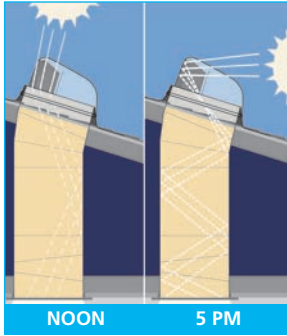

DIAMETER	LIGHT COVERS	LIGHT OUTPUT	Kit Length	Max Length
<b>25</b> cm	<b>13.94</b> m	UP TO <b>3-100</b> WATT LAMPS*	<b>1.2</b> m	<b>3.7</b> m
<b>36</b> cm	<b>28</b> m	UP TO <b>5-100</b> WATT LAMPS*	<b>1.2</b> m	<b>7.3</b> m

\*Based on full mid-day sun & 1.2m tube.

Extension tubes required for installations over 1.2m.  
Not recommended for heavily shaded roofs.

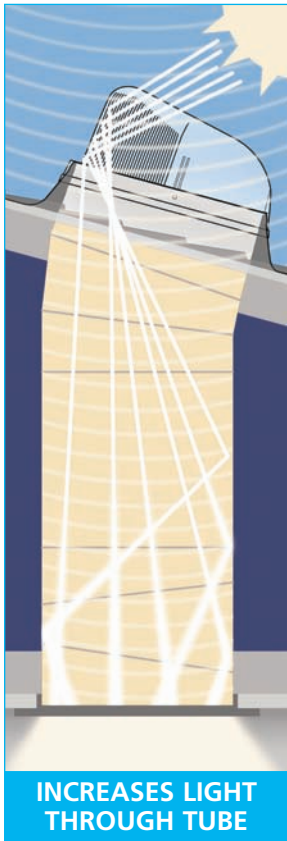

# Advanced optics brighten up to 28m with a single tube!

## Patented Solar Lens® Dome

Patented reflex optic technology gathers sunlight – even during low-light hours in the morning, late afternoon, or during the winter.

## Reflective Light Tube

Optimizes light reflected through shaft to control solar heat gain. UV stabilized finish will not yellow, fade, or delaminate.

## Dual Lens Tempered Glass Diffuser

Spreads soft, natural light throughout interior spaces. Reduces solar heat gain and eliminates condensation.

## TUBULAR SKYLIGHTS include:

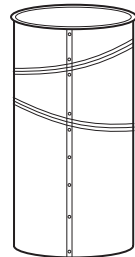

UV-Resistant Solar Lens® Dome  
25 cm dome shown

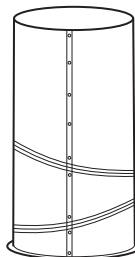

One-Piece Seamless Leak-proof Flashing  
(Asphalt, Metal, or Formable)
